

# ABUS GRANIT Detecto X-Plus 8077/12KS120

## Tootekirjeldus

The ABUS GRANIT™ Detecto XPlus 8077 12KS Black Loop Lock-Chain Combination offers an innovative alarm system alongside highly resistant locking technology.

The 8077 12KS120 Black Loop puts many obstacles in the way of thieves. Bolts of up to 13.5mm made from specially hardened steel. A chain to attach to a fixed object. A tamper-proof ABUS XPlus Cylinder. An alarm unit that emits a warning signal, which is audible from a considerable distance, if there is an unauthorised attempt to access your motorbike.

Once activated, the GRANIT™ Detecto XPlus 8077 yellow 12KS Black Loop displays a red flashing LED light to warn thieves to leave your bike alone. And if you ever need to lock up more quickly or have no suitable object to attach to, you can also use the lock on its own as a classic brake disc lock.

- 12 mm strong loop chain with fabric sleeve to prevent damage to the motorbike's paintwork
- The chain, the 13.5 mm bolt, the housing and the structural parts of the locking mechanism are manufactured from specially hardened steel
- 3D Position Detection – detects vibrations and the smallest movements
- Alarm at a volume of at least 100 dB for 15 seconds, followed by automatic reactivation
- The lock can be transported in a closed position without activating the alarm
- Acoustic and optical signals (multi-coloured LED) display the battery and activity status
- ABUS XPlus Cylinder for extremely high protection against manipulation such as picking
- Two keys included in the scope of delivery
- ABUS Code Card for duplicate and replacement keys
- Two standard AAA batteries to supply the electronic unit are included in the scope of delivery
