

# ABUS GRANIT Extreme Plus 59

## Tootekirjeldus

**The ABUS GRANIT EXTREME PLUS** chain lock consists of 12 mm thick hexagonal links wrapped in a durable nylon cover, which prevents paint and rim damage. With a length of 170 cm this lock allows you to secure one motorcycle to a fixed object, such as a pole. It is also possible to lock two motorcycles together.

With Security Level 20 this lock offers maximum protection in case of a high risk of theft. The lock body features patented ABUS Power Link technology, which ensures a direct and protected connection of the chain to the lock mechanism. In addition, the lock is protected against drilling all around and the famous ABUS X-Plus cylinder ensures a high protection against manipulation like lockpicking.

Chain, lock body and the internal elements of the lock mechanism are made of special hardened steel. For optimal theft protection, make sure that the chain lock is not placed on or near the ground. This protects the chain against heavy-handed manipulation. This chain lock comes with two keys, one with a LED light so you can easily open the lock in the dark.

## Technical Specifications

- 12 mm hexagonal links
- Length: 170 cm, suitable to lock 1 motorcycle to a fixed object, or to lock two motorcycles together
- ABUS Power Link technology, for a direct and protected connection of the chain in the lock

mechanism

- ABUS X-Plus cylinder for optimal protection against manipulation like lockpicking
- Chain, lock body and the internal elements of the lock mechanism are made of specially hardened steel
- Durable nylon protection cover prevents paintwork damage
- Supplied with two keys
- Practical sliding cover protects cylinder from dust and dirt
- This lock can be ordered with the same key, which means that you can operate several locks with one key.
