

ABUS 160

Tootekirjeldus

The ABUS 160 combination lock is suitable for locking doors, gates, cabinets, lockers, switch boxes and similar valuables that are to be protected against theft or unauthorised use. The padlock is particularly practical as it is operated by means of a number code instead of a key. Depending on the size of the lock, the number code can be set individually on a 3 or 4 digit number wheel. This means that several users can gain access to the secured goods at any time.

Technologies:

- Lock body and shackle in exclusive high-gloss chrome plating
- Shackle made from hardened steel
- Double bolted
- 160/40: individually resettable 3-digit code
- 160/50: individually resettable 4-digit code
