

TOOTENIMETUS	SOODUS	HIND
Haspe ABUS 110/230	It has a hardened steel eyelet, which makes it much more difficult to break open. The screws are concealed after assembly and the hinge pins are protected against being driven out. Because the following applies to every security solution: The longer it takes a thief to break into something, the better the chances that he will give up and move on.	42,88 €
