

ABUS Granit Plus 640/135

Tootekirjeldus

The GRANIT Plus 640 - compact and lightweight

Slightly wider than its predecessor, the Futura 64, and is capable of locking around reinforced parking meters despite it's compact size. It also features an array of security upgrades making this our highest security mini u-lock (12 out of 15).

The 640 is made of temper hardened steel in the shackle, case and supporting elements of the lock mechanism as well as other weight-optimized alloys. This results in a lock that is lightweight and strong.

- 12mm hardened steel round shackle
- Industry best corrosion resistance
- Shackle, case and supporting elements of the locking mechanism are made of special hardened steel
- Very intensive use of special weight-optimized alloy and light materials
- Soft-touch coating feels good in the hand and protects paint job from damage
- ABUS Plus cylinder offers high protection against picking
