Võtmete lõikamismasin Keyline Sigma Pro

Tootekirjeldus

- The graphic interface and colour touch screen controls make it easy to use for any operator, and, at the same time, give access to advanced software tools that are essential for the more expert and demanding users.
- The original key is read quickly and the ready installation of the blank, without further adjustments and without the use of any tools, make the key cutting cycle quite short.
- The key to be read is locked in place by a single-locking point clamp.
- Sigma Pro can cut a wide range of keys, thanks to the additional, easily exchangeable clamps.
- The USB, Ethernet and serial ports configuration makes it possible to connect the machine to external multimedia systems, thus simplifying the software and database updates.
- The Card Maker function makes Sigma Pro indispensable for any locksmith.
