Padlocks are portable locks used to protect against use of equipment, theft, vandalism or unauthorized entry.

Padlocks are available in many shapes and sizes to suit an almost endless array of applications from a travel suitcase through to train wagons and trucks.

Choosing the correct padlock for the application is very important. Using a heavy duty, high security lock combined with a light or flimsy latch, chain or fitting is pointless.

Description:

- High security padlock with 100 mm shackle.
- Cylinder mechanism: ABLOY® CLASSIC.
- An all-purpose padlock of durable construction for storage doors, motorcycles, gates, trailers, power station switches etc.
- The padlock body is manufactured from brass.
- The shackle is manufactured from case-hardened boron steel and is 8 mm in diameter.
- The PL330/100 contains 11 discs and is rekeyable, key is removable in locked position only.
- 2 keys included.

ABLOY® padlocks resist attack and the severest of climatic conditions.
