ABUS Steel-O-Flex Tresor 1360 Armored Cable Lock - 110 cm

Protection without a key

The ABUS Steel-O-Flex™ Tresor 1360 effectively secures your two-wheeler against theft with a 4-digit combination.

The overlapping steel sleeves with 20 mm thickness surround the inner steel cable like a tough outer metal skin. Once the individually adjustable numerical code has been selected, you can securely lock your bike with the Steel-O-Flex™ Safe 1360 without a key. A special scanning protection makes it difficult to crack the numerical code by manipulation. At the same time, the embossing of the numbers on the roller is such that you can set the right combination even in the dark.

Features of ABUS Steel-O-Flex Tresor 1360 Armored Cable Lock:

- Good protection with low risk of theft
- Recommended for securing inexpensive two-wheelers
- 20 mm thick, overlapping steel sleeves protect the internal steel cable
- Plastic coating to protect against damage to the paintwork
- 2-component number rollers ensure permanent legibility of the numbers

- Special scanning protection for increased security against unauthorised appropriation of the numerical code by manipulation of the mechanism
- Dark-scanning function facilitates use in the dark thanks to special number embossing Individually adjustable numerical code
- Due to the steel sleeves, Steel-O-Flex™ locks achieve a significantly higher level of security than simple cable locks while still maintaining a high level of flexibility (double protection)
- The combination lock is particularly suitable for use by several people
- Security Level Bike 6/15
