

ekey home kontroller

Tootekirjeldus

This control panel is used to open house doors, apartment doors, garage doors, etc. The control panel is intended for use in both domestic and business applications. The ekey home control panel mini is designed for DIN rail mounting in a distribution box on a 35 mm DIN rail and for use in protected interior areas. To operate the control panel, you will also need a compatible finger scanner and a suitable power supply.
